DIRECTIONS FOR USE ON ORNAMENTAL PLANTS

Transplanting: Drench newly planted soil area with HORMEX solution containing 1 teaspoon per 5 gallons water (10 drops per 1 gallon), once per week until established.

Bare Root Planting: Before placing bare root plants into soil, soak plants for 15 minutes in solution of 2 tablespoons HORMEX per gallon of water. Then follow the "transplanting" directions.

Lawns and Groundcover: Use 1 oz. per 100 sq.ft. applied through hose end sprayer.

Indoor Plants: Apply 1 teaspoon HORMEX per gallon of water, every time you water. This helps plants develop a healthy root system and lush foliage.

Cut Flowers: 1/2 teaspoon HORMEX per quart vase, makes cut flowers last longer.

Cuttings: Dip the base of cuttings in full strength HORMEX for 1 minute before planting in soil.

Store in a cool, dry place. Keep in original container. Do not reuse container.

Active Ingredients: 1-Napthaleneacetic Acid...0.240%, 3-Indolebutyric Acid...0.013%

Inert Ingredients:...99.747%, Vitamin B-1 (Thiamin Hydrochloride)...0.250%

CAUTION: KEEP OUT OF REACH OF CHILDREN.

STATEMENT OF PRACTICAL TREATMENT: Eyes: Flush eyes with water for 15 minutes. Skin: Wash with soap and water. Ingestion: Do not induce vomiting, promptly drink large quantities of water. Get medical attention.

Do not use this product on plants intended for food or feed purposes.
